Unique

Stale group chats and passive social media feeds both fail to foster genuine connection.

Why Lynk?

Minigames

Pool, imposter, etc, provide a low-pressure, frictionless way to strengthen friendships and engage with your circle daily.

Wall of Memories

Keep important memories all in one private place, to reminiscence and immortalize your circle

User Stories

“I want to easily bring my friends together through games, conversations, and planned events so that we can create lasting memories no matter how busy or far apart we are,”

“I want to stay connected and strengthen my relationships with my friends, even when we’re apart,”

“A big challenge I have is remembering to keep in touch with people, especially as life gets more chaotic. It’s easy to forget sometimes,”

What is Lynk

- **Core Purpose:** An app/game designed to strengthen relationships with friends, family, and your broader community.
- **Play Anywhere:** Keeps you connected whether you are hanging out in person or miles apart.
- **Activity Library:** Features a wide variety of party games and bonding activities (including Imposter, Pool, Slapjack, and Codenames).

MVP and Value Proposition

MVP

Lynk is a mobile-first social application designed to **bridge the gap between communication and shared experiences**. We focus on **active engagement**, allowing **small friend groups to drop into a dedicated space**, play real-time minigames, and effortlessly document their shared experiences in a private memory timeline.

Value Proposition

For friend groups **separated by different colleges, careers, and cities** who want to overcome the feeling of drifting apart, Lynk provides a **dedicated digital lounge** to effortlessly reconnect over quick games and shared photo timelines, **unlike** scheduled Zoom calls or broad social feeds that are **difficult to coordinate, impersonal, and exhausting**.

Product Features

Minigames

- Pool, slapjack, imposter, uno, etc

Wall of Memories

- Streamlined photo album, private feed

Scheduler

- Imports member's calendars to schedule hangouts

Video Calls

- Houseparty-esque interactive calling

Group Chat

- Customizable with stickers, backgrounds, themes, etc

Leaderboard

- Stay competitive with your friends, show off your skills!

Target Markets

- Young adults, primarily college students and recent graduates.
- Geographically dispersed due to new schools, internships, or early careers.
- Highly driven to prevent their tight-knit friend groups from drifting apart during major life transitions.
- Experiencing fatigue from passive, dormant group chats and unnatural, scheduled video calls.
- Seeking a low-friction, playful digital space to keep their friendships active and engaged.

Product Roadmap

Short-Term Goals

- Launch Lynk with core features
 - Circles (Groups)
 - Chat + 1:1 messaging
 - Basic scheduling
- Implement memories (photo sharing + tagging)
- Introduce simple minigames
- Onboard first users through:
 - Friend referrals
 - Campus organizations
- Collect user feedback and fix early bugs

Mid-Term Goals

- Implement fantasy sport features for conversation starters
- Enhance Scheduler
 - Sync availability with IOS + Google calendar
 - Add polls for decision making
- Expand social gaming
 - Add rewards to leaderboard
 - Virtual trophies and badges
 - Add more games
- Introduce Notifications and reminders

Long-Term Goals

- Scale to multiple campuses
 - Social media marketing, large-scale
 -
- Add multiplatform support
 - Windows
 - Mac
- Music sharing system
 - Spotify
 - Apple Music

OKRs: What We Want to Achieve

Grow User Base

- **500** student users
- **100** hangouts created
- **40%** retention (“would be disappointed”)

Build Habitual Usage

- **30%** DAU/MAU ratio
- **10 min** avg daily usage
- **1,000** shared memories

KPIs: How We Measure Success

User Interaction

Circle Density

- Tracks interactions per group
- Measures how connected users are

Feature Usage

Feature Adoption Rate

- % using:
 - Party Game
 - Wall of Memories

Engagement

Daily Active Users (DAU)

- Tracks daily usage
- Shows habit formation

SWOT ANALYSIS

S

Strengths

- Unique **social + shared experience features** (party game, memories)
- Strong **student-focused niche**
- Encourages **real interaction, not just messaging**

W

Weaknesses

- New app → **low initial user base**
- Needs **consistent engagement** to succeed
- Dependent on **network effects** (friends joining)

O

Opportunities

- Expand across **college campuses**
- Add new features (events, AI recs, etc.)
- Partner with **student orgs / universities**

T

Threats

- Competition from apps like Snapchat, Instagram, Discord
- Users may **lose interest quickly**
- Hard to stand out in a **crowded market**
